<b>Tender</b>	<b>Id</b>	ocds-h6vhtk-02e036		
	<b>LegalBasis</b>	<b>Id</b>	32014L0024	
		<b>Scheme</b>	CELEX	
	<b>Title</b>	Biological sample logistics and fulfilment services		
	<b>Status</b>	planned		
	<b>Classification</b>	<b>Scheme</b>	CPV	
		<b>Id</b>	64120000	
		<b>Description</b>	Courier services	
<b>MainProcurementCategory</b>	services			
<b>Description</b>	<p>OFH are seeking to engage the market and gain feedback on viable solutions for the most effective approach (commercial &amp; clinical solution) to collection and transportation blood samples from a wide variety of clinical and non-clinical settings to 4 UK processing sites (England, Scotland, Wales &amp; N. Ireland) Consideration is also being given to a wider service to include fulfilment services which include the provision of booking system, kit assembly, packaging and associated consumables as well as onwards postage to the processing sites. OFH are seeking to review both ambient logistics channels as well as cold chain to include temperature tracking options in order to maintain sample integrity</p>			
<b>Lots</b>	<b>0</b>	<b>Id</b>	1	
		<b>Description</b>	<p>The aim of Our Future Health is to recruit up to five million adults from across the UK to take part in the largest research study of its kind. Participants will be asked to provide information about their health and lifestyles and small sample of their blood. OFH will ask for permission to combine the information and samples provided with existing information about them, including their health records. Adding these additional types of information will help to build a more comprehensive picture of health and wellbeing that could be relevant to understanding what changes people's risk of disease. Combining these multiple sources of health and health-relevant information, including genetic data, will create an incredibly detailed picture that represents the whole of the UK. Researchers will use this information to make new discoveries about human health and diseases. OFH will use the health information, including genetic data, to calculate disease risk scores for participants in Our Future Health where possible. Based on these risk profiles, it might be possible to better identify</p>
